INTERFUSE

INTRODUCTION

Interfuse offers unparalleled automatic welding services across the globe, with the decisive deployment of world-class welding technologies and professionals. Our advanced automatic welding service for your project is custom-made and delivered by international pipeline experts, who are skilled at handling any complex requirements of your project.

We operate globally, with our partners and associates. As a welding partner, we provide you end to end tailored welding service to ensure the success of your project. We are committed to fulfilling your project's productivity demands and timelines in a surpassing manner.

Interfuse is managed and operated by European and Asian entrepreneurs & pipeline professionals.

INTERFUSE

INTERFUSE SERVICES AND PROFICIENCY

Interfuse, your trusted welding partner, renders, end to end welding service for your pipeline projects.

Our service package is comprehensive, and not limited to a few items such as the provision of equipment or crews, instead we customize it in such a way that our customers don't need to worry about the welding anymore. Furthermore, we relieve the welding scope from our customers and get it performed exclusively by us, giving our customers greater efficiency and outstanding results, whilst cutting down your project duration with overall less resource utilization and significant increase in your profitability.

INTERFUSE

WE DEPLOY OURSELVES AS AN EXCLUSIVE TEAM, EQUIPPED WITH THE FOLLOWING, TO PERFORM YOUR PIPELINE WELDING ACTIVITIES.

- Pipe facing machines with operators
- Preheating induction systems with operators
- Pneumatic Internal Line Up Clamps (ILUC) with operators
- Advanced automatic welding systems with power sources and related accessories, with qualified welders
- Fully equipped welding stations
- Pay welders / welding trucks.
- Equipment Technicians
- Line Supervisors
- Project Managers / Leaders for the job.

We are glad to discuss with our clients and customize our services furthermore, as per your project requirements and specific needs.

OUR BUSINESS MODEL

Interfuse's unique business model empowers us with cutting edge technologies, world class professionals and versatility to operate globally.

We render our comprehensive and advanced welding services to our customers on a “per weld joint basis”, This distinctive approach facilitates our customers, both commercially and operationally. Moreover, we plan and operate our services in a customer centric manner, giving our customers an added flexibility, extra transparency and better profitability. In an overall project perspective our automatic welding service contributes an increase of welding productivity to 3 - 5 times, whilst reducing the project cost significantly, in comparison to any conventional manual welding processes.

INTERFUSE

TECHNOLOGY PARTNERS

Our technology partners empower us with cutting edge welding and pipeline technologies.

We deploy the most suitable welding system for your project from the vast pool of technology partners spread across the globe, giving us a competitive edge.

Our clients wouldn't be limited to a particular type of welding system or technology, rather they get the right solution for the job.

WELDING CREW & EXPERTS

Our welders are well qualified, with hands on experience in the most advanced welding systems and with global pipeline project expertise.

We deploy an exclusive team, fulfilling the requirements of entire welding and related activities of the project.

LOCAL ASSOCIATES

Our local and regional associates empower us to operate as a local company, whilst serve you as an international company. This model gives added advantage, extra reliability and flexibility to our valued clients, globally.

We embrace local operations as a chance to involve local entities and local workforce.

TOGETHER, WE ACHIEVE REMARKABLE FEATS!

INTERFUSE
